## HiveWorx Products

Innovative, Data Driven Solutions enabling Integrated and Consistent Information across Enterprises.

### Extended Information Governance Toolkit (XIGT)

XIGT is unified Service Oriented Architectural (SOA) repository platform for Information Management. It bridges the gap between Business and IT by facilitating collaboration of Information Governance activities across the Enterprise. It provides comprehensive information integration capabilities by managing common Business and Technical metadata.

### Navigate360 Indoor Location Analytics

Navigate360 is an indoor location wayfinding mobile solution for point-to-point indoor and outdoor navigation, proximity-based notifications and mobile engagement. Our rich omnichannel 3D interactive map also seamlessly integrates with websites. Empower your visitors with an intuitive best-in-class wayfinding and mobile engagement platform.

### Hive Master Data Management (HiveMDM)

HiveMDM is MDM solution providing data integration, data quality, data governance, business process management, and master data management through a single platform powered by Hive's Extended Information Governance Toolkit (XIGT). HiveMDM provides a centralized repository, where data is gathered, indexed and synchronised reducing incoherence, out datedness, duplicity, incompleteness and ambiguity. Its dynamic attribute matching engine creates Golden Records which become a part of the Master View to be accessed by various systems across the enterprise.

### Hive Enterprise Performance Management (H-EPM)

Enterprise Performance Management is a strategic management framework for planning, monitoring, learning, improving and communicating the effective performance of an Enterprise. It supports integration of dispersed sources of information from within and outside the Enterprise to facilitate performance management across the board.

### Visitor360 Visitor Location Analytics

Visitor360 is a cloud-based, modern, highly accurate, flexible and reliable venue insights tool. It is an IoT platform with AI and deep learning intelligence that empowers customers with rich data to produce analytics on visitor flow, behaviour and trend as visitors move within any physical venue such as airports, shopping malls or an event location.

### HiveData Bank (HiveDB)

Hive Enterprise Data Bank (HiveDB) is a powerful data architecture that leverages the economics of big data. It addresses both business and operational challenges that were difficult to address using conventional data integration and data warehousing technologies. HiveDB Plug n Play solution is specifically designed to ingest data of every Variety, Velocity and Volume with great ease.

**HiveWorx Products are Robust,  
Agile, Flexible, Scalable,  
Configurable, Extendable and  
Regulatory Compliant!**

## HiveWorx Products

Our state-of-the-art products are based on Hive’s Innovation Methodology and thorough Research!

### Hive Healthcare Insight (HCI)

Hive Healthcare Insight (Hive-HCI) is our Out-of-the-Box flagship product that spans all business functions of a healthcare provider. It offers flexible, scalable, agile, technology agnostic, robust, cost-effective and comprehensive Data Warehouse & Advanced Analytics capabilities. It empowers the organisation with insights and analytics to help the business make timely, data driven decisions.

### Hive Hospital Insight Suite (HIS)

Hive Hospital Insight Suite (HIS) is a turnkey solution spanning all functions of a Hospital. It is an Enterprise Analytics Platform that empowers decision makers with powerful analytics and deep insight into the healthcare data, helping them make Timely, Data Driven decisions resulting in improved Patient Care and Satisfaction. HIS comes with pre-bult and fully configurable modules for an end to end Hospital Solution.

### Hive Nursing Practice Monitoring & Evaluation (H-NPME)

H-NPME is a State-of-the-art Tracking, Monitoring and Evaluation product designed for Nursing Practice Programmes. It is an Out-of-the-Box system that offers processes and activities designed to monitor and evaluate programme KPIs (Key Performance Indicators), this includes measurement, analysis and prediction of KPI performance across various dimensions.

### Hive Operating Theatre Analytics (H-OTA)

Hive OTA is a suite of information analytics to support Operational and Strategic management of Operating Theatres across any type of health organization, it provides fully modelled and developed operating theatre solutions including our proprietary Operating Theatre Benchmarks and KPIs. Hive OTA is also fully integrated with Extended Information Governance Toolkit XIGT.
